

“Simplicity is the ultimate sophistication.” – Leonardo DaVinci

**EqualLogic—
The Best Of
Class Backup
& Recovery
And Disaster
Recovery
Solutions**

DRIVEN BY THE VISION of simplifying networked storage, EqualLogic introduced an innovative iSCSI storage solution that delivers advanced software features with fully-redundant, hot-swappable hardware integrated within a modular chassis design. Customers can now enjoy the full benefits of an affordable, enterprise-class storage system that is easy to manage and always available. Profit from EqualLogic’s unique market advantages, including:

SOLID COMPANY

EqualLogic is a global leader in delivering award-winning, intelligent SAN solutions to hundreds of customers worldwide.

INNOVATIVE PRODUCTS

By delivering affordable “set it and forget it” enterprise SAN solutions, EqualLogic’s PS Series is widely recognized as the leading iSCSI SAN solution in the industry. EqualLogic delivers seamless, end-to-end storage solutions.

SATISFIED CUSTOMERS

With hundreds of successful deployments across all company sizes, applications and industries, EqualLogic’s customers highly recommend the PS Series to others and are willing to speak publicly about their success.

STRONG PARTNERSHIPS

EqualLogic participates in ongoing rigorous testing and certification, and holds active membership in industry organizations such as Serial ATA Working Group, SCSI Trade Association and SNIA.

UNMATCHED SUPPORT

With over 300 locations in 120 countries, EqualLogic delivers comprehensive technical assistance—wherever and whenever it’s needed.

efficient storage

EqualLogic Advantages

*CCSI stands behind
EqualLogic's storage
area networks.*

*They enable fast,
flexible storage setup
and provisioning
while dramatically
reducing the time
and cost required to
manage, maintain
and grow a SAN
environment—locally
or remotely.*

RECOGNIZED AS INDUSTRY'S BEST iSCSI SAN

- Editor's Choice award from Network Computing
- Named 'Best iSCSI SAN' by InfoWorld
- Strong installed base and customer endorsements
- EqualLogic provides automatic load balancing across controllers, caches, disks, array ports, server ports
- The only iSCSI Simple SAN full solution partner
- Block-based storage, designed for high performance applications

HIGHER PERFORMANCE I/O

- Three times higher I/O performance per disk drive based on public VeriTest reports
- Highest performance (outperforming NetApp) in independent InfoWorld evaluation
- Proven out in customer hands-on evaluation and real-world benchmarks
- Harnesses aggregated resources, delivering over 1,000,000 I/O's

FULL INTEGRATION WITH NATIVE MICROSOFT STORAGE TOOLS

- VDS, VSS, MPIO, DPM integration using native Microsoft tools and technology with no additional host software required to buy

ADVANCED, DYNAMIC TIERING AND POOLING

- Can migrate data between separate pools of different types of EqualLogic hardware online.
- When migrating, the snapshots move also with the data instead of being deleted.
- Automatically load balance workload across multiple generations of disk, controller, and RAID.

ADVANCED FEATURES

- Simple intuitive provisioning with automatic data layout
- Easy to expand volumes online across additional drives

MORE ADVANCED DATA PROTECTION AND DISASTER RECOVERY TOOLS

- Cloning, replication, host provisioning, and disaster recovery capability built into each array at no extra cost

LOWER PRODUCT LIFE CYCLE COST

- EqualLogic scales system resources as more disk drives are added
- Built-in data protection and disaster recovery tools

BETTER LOAD BALANCING FOR REAL-WORLD PERFORMANCE

- EqualLogic provides automatic load balancing across controllers, caches, disks, array ports, server ports
- EqualLogic can have multiple controllers work in parallel on the same load-balanced pool of disks.
- EqualLogic can have multiple controllers work on the same volume at the same time.

FULLY INTEGRATED REDUNDANCY AND FAILOVER

- Hot swappable, fully redundant components

EASIER TO BUY, DEPLOY, MANAGE, AND SCALE

- All inclusive low cost pricing model—full feature set at significantly lower cost
- Intuitive management interface with automated functions
- Single architecture, scales on demand

LOWER TOTAL COST OF OWNERSHIP (TCO)

- Lower acquisition and ongoing cost with seamless and more affordable upgrades
- No premium paid for software features, additional hosts, additional disks, or 5 year service contracts
